~~Comment. Shipments from Czechoslovakia have not been reported for a long time. Therefore, no comparable information has been received. Bad Schandau is the most important border railroad station for traffic to the USSR. The Dresden-Prague railroad line is double track. This railroad line is rarely used by the Soviets.~~

~~The imported crude oil is destined to GDR hydrogenation plants.~~

Most of the crude oil is of Austrian origin. Compared to previous deliveries, the crude oil shipments have decreased, and as compensation crude oil was imported from the USSR via Frankfurt/Oder.
